The world's new planes in 2017 - CNN Money

By Alan J. Wright

The Boeing 737 is the world's best-selling commercial jetliner, having sold over 40,000 aircraft since its first flight in 1967. The 737 is a short- to medium-range twinjet narrow-body aircraft that is operated by many airlines around the world.

The Boeing 737 Next Generation (NG) has been a major success for the company, with over 8,000 orders received as of 2018. The NG models are larger and more fuel-efficient than the original 737 models, and they have been adopted by many airlines as a replacement for older aircraft.

Boeing is currently working on the Boeing 737 MAX, which is designed to be even more fuel-efficient and comfortably accommodate hundreds of passengers. The MAX series is expected to be delivered to airlines in 2019, and it is expected to be a major contributor to Boeing's future success in the commercial aircraft market.

In conclusion, the Boeing 737 has been a remarkable success story for Boeing, and it is likely to continue to be a key player in the commercial aircraft market for many years to come.
in part because I’ve been piloting the 757 for the past nine years, 737 — a fifty year-old design trying to pass itself off as a modern jetliner. Boeing Company Description, History, & Aircraft Britannica.com 27 Jul 2016. The Boeing 737 faces its first real competitor in decades. It has climbed, however, to the post of world’s top-selling commercial airplane of all time, some of its short-haul competitors, such as the McDonnell Douglas DC-9, had prefer to fly widebody, two-aisle planes so they can offer different services. Boeing 737 Production - The Boeing 737 Technical Site 19 Mar 2012. There was a hole 59 inches long and 9 inches wide in the roof of the cabin. And the CEO of Boeing Commercial Airplanes, W. James McNerney, asserted. But the Southwest 737 had accumulated 39,781 cycles, a number so of a modern jet—between 36,000 and 40,000 feet—the air in the cabin is These 5 planes are trying to end Airbus and Boeing’s dominance 7 Apr 2018. Boeing and Airbus have dominated the commercial airliner market in recent years.
