Immune System - KidsHealth

The lymphatic vessels of the immune system carry immune cells, which helps the body defend itself against infection. A swollen lymph node often indicates an active immune response to a foreign invader.

Immune System: Cells, tissues, function, and disease - KidsHealth

The immune system is a host defense system comprising many biological structures and processes within an organism that protects against disease. It is a complex and integrated system of cells, tissues, and organs that protect against germs and microorganisms.

The immune system is the guardian of your galaxy, protecting your body from all sorts of germs and invaders. From your skin to tiny cells, learn how to boost your immune system.
