Performance Triangle: Diagnostic Mentoring to Manage Organizations and People for Superior Performance in Turbulent Times

by Lukas Michel

Performance Triangle: Diagnostic mentoring to manage people and organizations for superior performance in turbulent times. Lukas Michel has developed a model called the Performance Triangle, which is a tool for managing organizations and people for superior performance in turbulent times. The model consists of three components: leadership, culture, and systems. By focusing on these components, organizations can manage change and improve performance in turbulent times. The book provides practical guidance on how to implement the Performance Triangle in real-world situations. It is a valuable resource for managers, leaders, and organizations looking to improve their performance in challenging times.
